Ann Ledger, Architect

Web Site: www.annledger.com

Ann Ledger designs renovations and additions to stately homes. Though she designs in wood, brick, stone, shingles and other traditional materials, she creates residential spaces filled with light, adapted to modern living and in complete harmony with the originals. Her handcrafted approach starts with the plans and elevations she makes, with traditional tools like pencils, paper on a drafting table. M&P designed her new Web site with the same attention to detail, echoing the rich, handmade sensibility of her architecture.
